

CURRICULUM VITAE

Name: Nicholas A. Burd, PhD
Address: Department of Kinesiology and Community Health
College of Applied Health Sciences
University of Illinois at Urbana-Champaign
352 Louise Freer Hall
906 S. Goodwin Ave.
Urbana, IL 61801

Telephone: +1 217-244-0970 (work)
+1 765-730-3593 (cell)

Email: naburd@illinois.edu

EDUCATION

2011 – 2013

Maastricht University Medical Centre+, Department of Human Movement Sciences (Maastricht, The Netherlands)

Position: Postdoctoral research fellow Supervisor: Luc JC van Loon, Ph.D.
Project Focus: Preservation of muscle mass with advancing age

2007 - 2011

Doctor of Philosophy, McMaster University (Hamilton, ON Canada)

Degree: Kinesiology Supervisor: Stuart M Phillips, Ph.D.
Thesis Title: Contractile and Nutritional Modulation of Human Skeletal Muscle Protein Synthesis

2005-2007

Master of Science, Ball State University (Muncie, IN USA)

Degree: Exercise Physiology Supervisor: Todd A Trappe, Ph.D.
Thesis Title: The effect of a cyclooxygenase-2 inhibitor on human muscle protein synthesis after acute resistance exercise

2000-2005

Bachelor of Science, Ball State University (Muncie, IN USA)

Degree: Exercise Science, Applied Science

PROFESSIONAL EXPERIENCE

2011-2013 Postdoctoral research fellow
Maastricht University, Maastricht, The Netherlands

- 2007-2011 Research/Teacher Assistant: Exercise Metabolism Research Group
McMaster University, Hamilton, ON Canada
- 2005-2007 Graduate Research Fellowship: Human Performance Laboratory
Ball State University, Muncie, IN USA
- 2003-2005 Undergraduate Research Assistant: Human Performance Laboratory
Ball State University, Muncie IN USA
- 2004 Internship: Human Performance Clinical/Research Laboratory Colorado State
University, Fort Collins, CO USA

PUBLICATIONS (peer reviewed)

Burd NA, Hamer HM, Pennings B, Pellikaan WF, Senden JMG, Gijsen AP, van Loon LJC. Substantial differences between organ and muscle specific tracer incorporation rates in a lactating dairy cow. PLoSOne (in press).

Burd NA, Pennings B, Groen BBL, Gijsen AP, Senden JMG, van Loon LJC. The single biopsy approach is reliable for the measurement of muscle protein synthesis rates in vivo in older men. J Appl Physiol. 2012 Sep;113(6):896-902, PMID: 22815390

Robinson MJ, **Burd NA**, Breen L, Rerечich T, Yang Y, Hector AJ, Baker SK, Phillips SM. Dose-dependent responses of myofibrillar protein synthesis with beef ingestion are enhanced with resistance exercise in middle-aged men. Appl Physiol Nutr Metab. 2013 Feb;38(2):120-5, PMID:23438221

Wall B, Dirks M, Verdijk L, Snijders T, Hansen D, Vranckx P, **Burd NA**, Dendale, van Loon LJ. Neuromuscular electrical stimulation increases muscle protein synthesis in elderly, type 2 diabetic men. AJP–Endocrinology and Metabolism. 2012 Sep;303(5):E615-23, PMID:22739107

Yang Y, Churchward-Venne TA, **Burd NA**, Breen L, Tarnopolsky, Phillips SM. Myofibrillar protein synthesis following ingestion of soy protein isolate at rest and after resistance exercise in elderly men. Nutr Metab (Lond). 2012 Jun 14;9(1):57, PMID:22698458

Camera DM, West DW, **Burd NA**, Garnham A, Phillips SM, Hawley J, Coffey V. Low muscle glycogen concentration does not suppress the anabolic response to resistance exercise. J Appl Physiol. 2012 May 24, PMID:22628371

Mitchell CJ, Churchward-Venne TA, West DWD, **Burd NA**, Breen L, Baker SK, Phillips SM. Resistance exercise load does not determine training-mediated hypertrophic gains in young men. J Appl Physiol. 2012 Apr 19, PMID:22533517

Donges CE*, **Burd NA***, Duffield R, Smith GC, West DWD, Short MJ, Mackenzie R, Plank LD, Shepherd PR, Phillips SM, Edge JA. Concurrent resistance and aerobic exercise stimulates both myofibrillar and mitochondrial protein synthesis in sedentary overweight middle-aged men. J Appl Physiol 2012 Jun; 112(12):1992-2001, PMID:22492939
**designates co-authored manuscripts*

Churchward-Venne TA, **Burd NA**, Mitchell MJ, West DWD, Philp A, Marcotte GR, Baker SK, Baar K, Phillips SM. Supplementation of a suboptimal protein dose with leucine or essential amino acids: effects on myofibrillar protein synthesis at rest and following resistance exercise in men. *J Physiol* 2012 Mar 25, PMID:22451437

West DW, **Burd NA**, Churchward-Venne TA, Camera DM, Mitchell CJ, Baker SK, Hawley JA, Coffey VG, Phillips SM. Sex-based comparisons of myofibrillar protein synthesis after resistance exercise in the fed state. *J Physiol* 2012 Mar 1, PMID:22383503

Burd NA, Andrews RJ, West DWD, Little JP, Cochran AJR, Hector AJ, Cashaback JGA, Gibala MJ, Potvin JR, Baker SK, Phillips SM. Muscle time under during resistance exercise stimulates differential muscle protein sub-fractional synthetic responses in men *J Physiol* 2012, Jan 15;590(Pt 2):351-62, PMID:22106173

Burd NA, Groen BBL, Beelen M, Senden JMG, Gijsen AP, van Loon LJC. The reliability of using the single biopsy approach to assess basal muscle protein synthesis rates *in vivo* in humans. *Metabolism*, 2012 Mar 9;8:15, PMID:22209666

Yang Y, Breen L, **Burd NA**, Hector AJ, Churchward-Venne T, Josse AR, Tarnopolsky MA, Phillips SM. Resistance exercise enhances myofibrillar protein synthesis with graded intakes of whey in older men. *Br J Nutr.* 2012 Feb 7:1-9, PMID:22313809

Burd NA, Yang Y, Moore DR, Tang JE, Tarnopolsky, Phillips SM. Greater stimulation of myofibrillar protein synthesis with ingestion of whey protein isolate versus micellar casein at rest and after resistance exercise in elderly men. *Br J Nutr.* 2012 Jan 31:1-5, PMID:22289570

West DWD*, **Burd NA***, Coffey VG, Baker SK, Burke LM, Hawley JA, Moore DR, Stellingwerf T, Phillips SM. Rapid aminoacidemia enhances myofibrillar protein synthesis and anabolic intramuscular signaling responses after resistance exercise. *Am J Clin Nutr.* 2011 Sep;94(3):795-803, PMID:21795443 **designates co-authored manuscripts*

Burd NA, West DW, Rerecich T, Prior T, Baker SK, Phillips SM. Validation of a single biopsy approach and bolus protein feeding to determine myofibrillar protein synthesis in stable isotope tracer studies in humans. *Nutr Metab (Lond).* 2011 Mar 9;8:15, PMID:21388545

INVITED SPEAKER

Nicholas Burd. “Does chronically consuming protein immediately after exercise actually cause you to get strong (resistance training) or faster (endurance training)?” American College of Sports Medicine (ACSM). May 28-June 1, 2013; Indianapolis, Indiana USA

Nicholas Burd. The effect of resistive exercise on muscle carbohydrate and protein metabolism. In symposium: “Acute and chronic responses to concentric and eccentric exercise”. American College of Sports Medicine (ACSM). May 28-June 1, 2013; Indianapolis, Indiana USA

Nicholas Burd. Contraction induced changes in muscle protein synthesis—Does exercise load matter? In symposium: “Sensing the tension: Identifying Mechanotransducers that Regulate Muscle Growth”. American College of Sports Medicine (ACSM). May 28-June 1, 2013; Indianapolis, Indiana USA

Nicholas Burd. Protein intake – before, during, or after to enhance endurance and strength training adaptations. Danish Sports Medicine Congress. Invited lecture. Jan 31 – Feb 2, 2013; Kolding, Denmark

Nicholas Burd. Protein and recovery from exercise – Are guidelines the same for all sorts of exercise? American College of Sports Medicine (ACSM), invited lecture. May 30 2012, San Francisco, California USA

Nicholas Burd. Contractile and nutritional modulation of human skeletal muscle protein synthesis. In the masterclass for Prof. dr. Alfred Goldberg, Striated muscle plasticity and metabolism in health and disease, Maastricht University, January 16, 2012, Maastricht, Netherlands

Nicholas Burd. Impact of resistance exercise intensity on human skeletal muscle protein synthesis. Department of kinesiology seminar, McMaster University, October 22, 2009, Hamilton, ON, CA

Nicholas Burd. Impact of resistance exercise intensity and anabolic hormones on human skeletal muscle protein turnover. Department of Sport & Exercise Science Research seminar, University of Auckland, Tamaki Campus, October 9 2009, Auckland, NZ

Nicholas A. Burd, Daniel WD West, and Stuart M. Phillips. Scientific update related to resistance exercise intensity and protein dose effects on human skeletal muscle. Sobre Entrenamiento Group Symposium. Online symposium. June 15, 2009

GRANTS and AWARDS

2011 ACSM Charles M. Tipton National Student Research Award

The Physiological Society Travel Grant. 2010
Awarded: £ 500

McMaster University School of Graduate Studies International Excellence Award 2010.
Awarded: 10,000 CAD
